

728 Series Gun

Fine finish, non-bleeder spray gun

- Similar design to discontinued Graco 244 gun
- Superior finish quality
- Independent material and air adjustments
- Non-bleeder air design

966 Series Gun

Robust, durable, bleeder spray gun

- Same design as all-chrome 710 gun
- No O-rings
- Bleeder air design
- Very durable design sprays well even when dirty

Both guns are compatible with all major manufacturers of turbine sprayers

New 728 Gun vs. Graco 244 Gun

- New air fan adjustment control reduces failure rate and is held in place with allen screw to eliminate popping out!
- New all-metal air valve eliminates brass button!
- Fewer O-rings — now only two!
- New solvent resistant, aluminum, air cap retaining ring!

New 966 Gun vs. Model 710

- New nylon handle reduces heat for operator, and eliminates need of slip on insulator!
- All parts including fluid sets interchange with all chrome 710 guns!
- New and improved material control knob!

Accessories

H/O Air Valve for Natural Stone Accent

Allows user to reduce atomizing air without affecting cup pressure giving more control of speckle size

Air Brushes for Touch-Up and Chip Repair

Gravity feed and cup-below options

"I get a better finish with easier setup and less mess than my old Paasche airbrush"

- Steve Lageson
MM Mpls. South

3M PPS Cups

1 qt. and smaller 6 oz. touch-up cup use same adaptor
