## Three Levels of Protection

### Thumb Press Test

**Lightweight** - Thin material is breathable and works well with dry particulate such as dust and spray foam.

**Middleweight** - Good compromise between durability and breathability while improving chemical protection.

**Heavyweight** - Maximum durability and chemical protection. Better breathability than comparable brands.

## The Best and Safest Way to Notify Applicator of Breathing System Alarm

RAS provides communication between a high pressure breathing system and a Graco Reactor. In the event the carbon monoxide monitor alarms, the RAS will immediately shutdown the Graco Reactor. The applicator will then vacate the spray area to investigate the problem, where they will be notified of the contaminated breathing air by an audible and visual alarm.
